bevelopmental psychology is about now and why people's deleviour changes as mey go arough different life stages, including before birth, intancy, childhood adolescence, adulthood and old age. Some changes are biological, but others result from experiences such as parental care, miaractions and play with siblings and thervis, and occess to carefully planned interventions.

to this topic, you will tear they psychologists investigate Only hetween intency and future development. We begin to considering the first relationalings tables form when entering the world. Many psychologists believe that those attachments are of content importance. Others think greater attention should be paid to experiences throughout the klespan, all of which can amport or disrupt our ability to live a long and meaningful life.
